

# ABC of the Triple Cities

## **OSHA CRANES & DERRICKS QUALIFIED SIGNAL PERSON (3RD PARTY EVALUATOR)**

This course will assist with compliance of OSHA's new Cranes and Derricks Standard. Statistics show that 25% of all crane fatalities are a result of contact with overhead electrical power lines. Of these fatalities, those at greatest risk are workers on foot, touching or guiding loads or cables. This course is designed for those individuals who will signal crane operators during lifting operations and ensure they are qualified. Individuals who complete this course will know and understand the type of signals used including radio signals and standard methods for hand signals; gain competence in the application of the type of signals used; acquire a basic understanding of equipment operation and limitations, including Crane dynamics involved in swinging and stopping loads and boom deflection from hoisting loads; know and understand the relevant requirements of OSHA Parts 1926.1419 through 1926.1422 and Part 1926.1428. Participants will be required to demonstrate their understanding of these requirements through both a written and practical examination. Students who successfully complete the course and pass both examinations will receive a course completion card stating which types of signaling they are qualified in.

**Date:** Tuesday, January 22, 2019      8:00 AM to 12:00 PM

**Cost:** Instruction is free of charge, made possible by a grant from The NYS DOL Occupational Safety & Health T & E Program. However there is a \$7.50 per person fee for beverages, snacks and course completion card.
