Dig Safely New York Excavator Certification

The Dig Safely New York, Inc. Certified Excavator Program in Safe Digging Best Practices has set a new standard for training New York State professional excavators in the proper procedures of excavation. When a person has successfully completed the Dig Safely New York Certified Excavator Program (CEP) in Safe Digging Best Practices, they are certified by the one-call center for five (5) years*, demonstrating a fundamental understanding of the Safe Digging Best Practices that should be used for safe excavation in accordance with the Common Ground Alliance Best Practices and New York State Code Rule 753.

**Certifications are good for five (5)-years as long as the individual successfully attends one (1) free renewal class each year between the year certified and the expiration year. Free renewal classes include any individual/company training requested, any free Excavator event, or any of the nine (9) annual Excavator Safety Seminars, hosted each March.*

There will be four classes and they are limited to the first 25 people. The Association does not control the classes we are just facilitating. Register early they are open to the public.

Date: Thursday, February 14th, 2019, 1:00 PM till 5:00 PM
