

Builders Exchange of the Southern Tier

OSHA CONFINED SPACE

Upon completion of the course, students will understand how to evaluate and determine what hazards are present or likely to be present that could injure employees during confined space entries. These will include engulfment hazards, hazardous atmospheres, mechanical hazards and entrapment hazards.

They will also learn to develop confined space entry and rescue procedures that identify the hazards of entering confined spaces in their workplace. Discussion will focus on the importance of rescue procedures while working in confined spaces and will help the audience evaluate the capabilities of their designated rescue team to respond to confined space emergencies.

Date: Friday, February 15th, 2019
8:30 AM to 12:30 PM

Cost: Instruction is free of charge, made possible by a grant from The NYS DOL Occupational Safety & Health T & E Program. However, there is a \$7.50 per person fee for beverages, snacks and course completion card.
